One platform.

Every journey.

• WHO WE ARE

ORN — Orchestrated Rhythms of Nature — has built the operating system for intelligent travel. We orchestrate every flight, hotel, experience and journey on a single unified platform, powered by our proprietary **NX/OS intelligence layer**.

Backed by the **HCL Group** — a \$60 billion enterprise — ORN has the operational scale, financial stability and technology depth to be the definitive global travel platform. Our consumer brand **TripFactory** distributes product to **80,000+ active trade agent partners** across India, UK and Europe.

• BUILT ON FIVE PILLARS

- 1 Trusted Global Brand**
Built on transparency, trust & excellence
- 2 Global Distribution**
Americas · Europe · Middle East · Asia-Pacific
- 3 NX/OS Technology**
Proprietary AI · API-first · ISO 27001 certified
- 4 HCL Financial Backing**
\$60B group · Zero debt · Profitable since Day 1
- 5 People & Infrastructure**
226,000+ professionals · 200+ delivery centres

• OUR TRAVEL ECOSYSTEM

ORN offers partners a fully integrated distribution ecosystem — six class-leading verticals all powered by NX/OS, with your inventory intelligently surfaced to the right traveller at exactly the right moment.

ORN Hotels

1.2M+ properties · AI-matched to traveller profiles

ORN Flights

Thousands of routes · Real-time price intelligence

ORN Experiences

Curated activities · Attractions · Transfers

ORN Cruise

Ocean & river · All major lines on one platform

ORN Rail

High-speed & scenic · Eurostar to Shinkansen

ORN Cars

Global hire · EV · Corporate & leisure fleet

• CONNECTED PARTNER NETWORK

AIRLINES	Emirates · British Airways · Qatar · Etihad · Lufthansa · Singapore · Qantas
HOTELS	Marriott · Hilton · IHG · Hyatt · Accor · Four Seasons · Radisson · Wyndham
GROUND	Hertz · Avis · Sixt · Viator · GetYourGuide · Klook · TUI · G Adventures

How we connect.

Seamlessly & intelligently.

ORN's NX/OS platform is **API-first and built for scale**. We support both static and dynamic connections, giving partners the flexibility to distribute in whichever way best serves their business model. Our technology team works with partners to ensure fast, clean integrations.

• CONNECTION OPTIONS

Static / Net Rate Contract

Traditional fixed-rate contract loaded directly into our system. Ideal for partners who prefer set seasonal or annual rate loading. Our contracting team reviews and loads all static rates centrally.

Dynamic / API Connection ★ Preferred

Real-time pricing and availability via direct API integration. Our preferred connection method — gives partners live rate control, instant inventory updates and maximum booking conversion. We support REST/JSON API format.

Channel Manager / Extranet

We are already integrated with leading channel managers including Webhotelier, SiteMinder and others. If you use a channel manager, connection is straightforward — simply approve TripFactory/ORN as an agent through your existing platform.

• CURRENCY SUPPORT

We support multi-currency via API — **GBP, EUR and USD** as standard. Additional currencies can be discussed depending on partner setup. Each currency may require a separate API feed or can be handled as a parameter within a single connection — confirmed at technical setup.

• TESTING & CERTIFICATION

A **sandbox / test environment** is available for all API integrations. Partners complete technical and commercial certification before going live to ensure all product requirements are met and booking flows are fully validated.

• NX/OS — OUR INTELLIGENCE LAYER

NX/OS is ORN's proprietary intelligence layer — the engine that learns every traveller's preferences, mood and context, then proactively surfaces the right property at the right moment. For partners, this means **smarter visibility and higher conversion**.

• END-TO-END BOOKING FLOW

1 Discovery

NX/OS surfaces your property to matched travellers based on profile, destination & budget

2 Search & Price

Live availability & pricing returned via API or loaded from static contract

3 Booking

Booking placed through TripFactory/ORN platform — confirmation sent to partner system

4 Amendment

Amendments and changes handled via API or direct communication to our operations team

5 Cancellation

Cancellation flow managed per booking conditions — automated via API where supported

Your questions, *answered.*

SECTION 1 — RATES, CONTRACTS & COMMERCIAL TERMS

Q Do you require static contracts or can you work dynamically?

A We work with both. Our preferred route is a dynamic/API connection as it provides live rate and availability control. However, we are equally comfortable loading static net rate contracts into our system where a dynamic connection is not available. In all cases, we need to formally review the terms, payment details and booking conditions before going live.

Q How is pricing structured — net rates or commission on retail?

A We work primarily on a net rate basis, which we mark up to create our selling price. This gives partners greater flexibility and allows us to remain agile and competitive in our markets. Commission structures can also be discussed where net rates are not the partner's standard model.

Q What are your payment terms?

A Payment terms are agreed per partner and vary depending on the commercial model in place. Standard terms are outlined in the contract or booking conditions. For API-connected partners, payment terms are typically confirmed during the commercial onboarding process. We are open to discussing terms that work for both parties.

Q Can you work with FIT rates and Group rates separately?

A Yes. Our platform supports both FIT (individual traveller) and Group rates. We would ask partners to provide separate rate structures for each where applicable. Group rates are particularly important for our MICE, incentive and tour programme business, which represents a significant and growing segment of our volume.

Q What is your current production in key destinations?

A We treat production data as commercially sensitive, but we are happy to share directional information during commercial discussions. As a benchmark: our UAE hotel revenue is approximately \$2M USD annually, with Dubai representing around 65% of that. We are actively growing across all destinations and can share destination-specific volume data under NDA where relevant.

Q Do you have preferred partner or preferred operator status?

A Yes — we offer preferred partner arrangements which include priority placement in our platform, co-marketing opportunities, dedicated allocation agreements and inclusion in our agent-facing promotional campaigns. These are agreed on a case-by-case basis during commercial discussions.

Technical & *operational answers.*

SECTION 2 — API, CONNECTIVITY & ONBOARDING

Q What API format does ORN support?

A Our platform is API-first and supports REST/JSON format as standard — the most widely used format in the travel industry. We can also work with XML where required. Full API documentation, sandbox credentials and an integration guide are provided during the technical onboarding process.

Q Can you support multiple currencies via API?

A Yes. We support GBP, EUR and USD as standard currencies via API. Depending on the partner's setup, each currency may require a separate API feed or can be handled as a parameter within a single connection — this is confirmed during technical setup. Additional currencies can be discussed based on market requirements.

Q Is content cached or is pricing returned in real time?

A This varies by supplier and connection type. For directly connected API partners, live availability and real-time pricing is our preference. Where content is cached, it is updated on a regular schedule. We work with partners to determine the optimal approach based on their system capabilities and the nature of their inventory.

Q Is there a sandbox or test environment before going live?

A Yes. A sandbox and testing environment is available for all API integrations. Partners are required to complete both technical and commercial certification in the sandbox environment before being moved to live. This ensures that all product requirements, booking flows, cancellation logic and payment processes are fully validated before any real bookings are processed.

Q What does the onboarding process look like end to end?

A Step 1: Initial commercial discussion and agreement on rate structure and connection type. Step 2: Completion of partner setup form and signing of API/commercial agreement. Step 3: API credentials and sandbox environment issued to our technical team. Step 4: Integration development and testing in sandbox. Step 5: Technical and commercial certification completed. Step 6: Go-live and content loading — your inventory is live on ORN/TripFactory. Step 7: Ongoing account management and performance review.

Our Team

• HOW TO GET STARTED

1 Get in Touch

Contact our global supply team at global@orn.com or reach out directly to your regional ORN contact. We respond to all enquiries within 24 hours.

2 Initial Discussion

We will schedule a call or Teams meeting to understand your property portfolio, preferred connection type and commercial requirements. No lengthy forms — just a straight conversation.

3 Commercial Agreement

Once aligned on rates and connection type, we issue our partner agreement for review and signature. Our legal and commercial terms are clear and fair.

4 Technical Setup

Our technology team coordinates the API integration or rate loading. We issue sandbox access, certify the connection and confirm go-live readiness.

5 Go Live

Your inventory is live on TripFactory and ORN.com — visible to our 80,000+ trade agent partners and direct consumer base worldwide.

• CONTACT OUR SUPPLY TEAM

Whether you are a hotel, DMC, attraction, airline or ground operator — we would love to hear from you. Our global supply team is ready to discuss how ORN can bring you meaningful, consistent, long-term business.
